**DETAILED ACTION**

**Reasons for Allowance**

Claims 1-23 are allowed.

This is examiner's statement of reasons for allowance.

The instant invention recites a method of reading image information by using an image detector enabling recording of the image information by storing an electric charge obtained by detecting an electromagnetic wave representing the image information, the image information reading method comprising the step of carrying out main reading for reading the image information by obtaining an electric signal in accordance with an amount of electric charge stored in the image detector, the image information reading method further comprising the steps of:

carrying out pre-reading prior to the main reading; analyzing the electric signal obtained by the pre-reading; determining a normalization processing characteristic used for carrying out normalization processing on the electric signal obtained by the main reading; and

carrying out the normalization processing on the electric signal obtained by the main reading, based on the normalization processing characteristic that has been determined;

wherein, in the pre-reading, some of the electric charges to be read out during the main reading are read out.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Art Unit: 2622

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
